

CM-CT6 COMPOST TURNER

APPLICATION

Aeration of compost; triangular windrow turning

Windrow size (max) 2.4m H x 5.7m W

Production rates of up to 900m³ per hour, depending on the material

FEATURES

- Robust construction with easy access ladders
- Corrosion resistant lining
- Comfortable, climate controlled cabin with excellent visibility
- Wheel drive, skid steer with joystick control
- Adjustable drum height
- Easy access and simplified maintenance
- Dynamic jockey wheel stabilisation
- High and low range speed control
- Electronic Management System with failsafe E-stop circuit
- High production throughput and thorough mixing

SPECIFICATIONS

Height	5000mm
Width	8720mm
Length	6530mm
Weight (approx.)	7,500kg
Diesel engine	250kW, Turbo Diesel, Water Cooled
Drum width	6000mm

Hydraulic System

Max. Flow	500 lpm
Max. Pressure	300 bar
System Oil Volume	170 litre
